

Standard Service Warranty Policy

Intrepid Aerospace, Inc.

Intrepid Aerospace, Inc. warrants repair and overhaul services performed to be free from defects in material and workmanship at the time of delivery. Liability is limited to replacement or repairing of any part which may be damaged as a result of such defect. The obligation of Intrepid aerospace, Inc. under warranty is limited to correction at its facility of any parts or components which have been returned under this warranty and is subject to the following conditions:

Repaired Units

Labor and newly installed components will be warranted for an interval of twelve (12) months from the return to service date. Coverage is limited to labor and parts replaced during the previous repair. This warranty does not apply if the aircraft is involved in an incident.

Overhauled Units

Labor and newly installed components during previous overhaul will be warranted for an interval of twelve (12) months from the return to service date. This warranty does not apply if the aircraft is involved in an incident.

Items not covered by this warranty include corrosion damage due to harsh environment either in service or in storage.

Liability

Intrepid Aerospace, Inc. Liability under the terms of this Warranty Service Policy shall be limited to the repair of any defect required to return the unit to service at this facility.

Intrepid Aerospace, Inc. will warrant the component or components that have been installed during the servicing of a customer's unit during the warranty period.

Intrepid Aerospace, Inc. shall not be obligated for any defects if examination reveals that said defect is due to improper installation, removal, use or mishandling, tampering and or improper storage after leaving the facility. If any warranty seals or stickers are removed or tampered with in any way, this warranty shall be voided.

Intrepid Aerospace, Inc. shall have no liability for the consequential or special damages including, but not limited to, loss of use, and cost of removal, reinstallation or other associated expenditures including potential loss from use of the aircraft.
